Sorna™

DIGITAL IMAGING **SIMPLIFIED**

expēdo® Systems

the difference is our software...

Sorna pioneered the concept of automated DISC production more than a decade ago. Our innovations excel at making it easy to manage the importing, exporting, management, and display of medical records and diagnostic images on portable media.

The latest generation of Sorna's DISC publishing systems, powered by eXpedo software, streamlines the custom creation of patient records through programmed automation. Conformant to DICOM standards and IHE Profiles, its 24/7 reliability produces the results you need.

The eXpedo family of recording systems target every production level and budget. Intelligent workflow optimizing management software using DISCflow™ Profiles customizes and automates CD and DVD DISC production, allowing you to cater to a variety of preferences within your healthcare facility, enhancing efficiency and eliminating delays.

eXpēdo®

WORKFLOW **INTELLIGENT** SOFTWARE

Reliable.

"Finally – A media burning software solution that simply works."

– Dan, PACS Administrator

Easy.

"Front desk personnel simply use the web interface to submit the CD request, monitor its progress and provide it to the patient as soon as it is finished."

– Micha, PACS Administrator

Versatile.

"We can select studies from multiple patients and anonymize them with one click to make CDs for our Radiology Fellows and Interns."

– Pat, PACS administrator

Affordable.

"Sorna has the right product at the right price to meet the production demands of our facilities – from an Imaging Center to a large hospital."

– Debra, Radiology Director

Key Features

Simple and intuitive **web interface** for regular users to submit and monitor jobs

Web-deployed client **interface for advanced users** and administrators

DICOM and IHE PDI **conformant media** to ensure interoperability

Fully automated creation of single or multi-study media from images sent by any DICOM device

Query & Build to submit multiple jobs one right after the other - you never have to wait for the retrieval of studies

Automatically **include Structured Reports** along with studies

Conveniently monitor the **detailed status of every job**

Easily check the **status of any eXpedo autoloader** from anywhere on your network

Automatic **DISC spanning** to ensure proper fit on selected media

Smart media function to automatically select CD or DVD minimizing number of DISCs produced

Media Template definitions eliminate errors by assigning user pre-sets for Job Type, Viewer, and Label Style

Meet new production needs – simply add a **DISCflow Profile** by selecting preferences from a menu

Multi-Patient, **one-click study de-identification** for creating teaching and seminar DISCs

Web-deployed **DICOM media importer** to quickly re-create or import incoming DISCs

Detailed logs of content, production and recipient of each uniquely serialized DISC make **HIPAA record-keeping** easier

Automated system backup for rapid disaster recovery

Protect patient privacy by standards-conformant **password encryption of media** content

Use our embedded viewer to decrypt, **view and access encrypted data** on the fly
