Reviewer CD

Sorna's FREE Solution to Viewer Confusion

Today, healthcare professionals receive DISCs from a greater number of sources than ever, each of them requiring a different viewer.

ReviewerCD, a **FREE** DICOM CD/DVD viewer, is designed for use by medical professionals seeking a single, universal viewing platform to deal with the dizzying variety of incoming DISCs. This easy-to-use viewer allows you to browse and view files, even encrypted DICOM files, from any DISC. **ReviewerCD** also enables you to print files to paper with a standard Windows printer.

Reviewer R-Scan

Scan Documents to PACS

Paperless is still an option. Easily scan paper documents and store them digitally.

Works with your TWAIN scanner to DICOMize, organize and unify records, automatically adding them to the appropriate study. Multiple series can be created, and then added with a single click.

Reviewer 2DICOM

Drag & Drop Multimedia to PACS

Enrich and add content to your studies with multimedia files and documents. Drag & Drop numerous file formats to DICOMize and incorporate them into your PACS.

Scan and DICOMize existing documents. Use popular office document and image format files from your local, networked or removable devices.

Reviewer Importer

Import from Multiple Sources

Add a new level of simplicity when patients arrive with external studies. Upload any DISC containing DICOM files, and some proprietary formats - even encrypted data.

Also use sources such as USB Drives, iPods, or any networked device or directory. Quickly and easily match study demographics from internal PACS and worklists; reconcile patient data if needed. No need to invest in an additional bulky device – this software can be loaded on any existing PC.

Reviewer MD

Power and Simplicity for the Laptop

Bring portability, power and simplicity to acquiring, viewing, storing and sharing studies. Import files, even encrypted data, with greater ease and from more sources (DISCS, USB Drives, iPods, any networked device or directory).

Expand your export options to include PACS, local and network drives, memory sticks and DISCS. Even choose to store as a .jpeg file or send to a Windows™ printer. Protect patient privacy with one-step, on-the fly data encryption.

Reviewer Admin

Master Edition Combines All Features

Designed as the ultimate tool for the PACS Administrator. This Master Edition offers the combined power of features from ALL the Reviewer Editions.

Reviewer Admin allows the site system administrator to quickly and conveniently import new patient data; burn patient DISCS; change system settings; manage security; scan, DICOMize, re-identify files and more. Reviewer Admin edition providesthe intelligent solution to fit your needs!

Reviewer Embedded

Reviewer Embedded: View CD Images

CDs burned using Reviewer automatically embed our viewing software that runs directly from the DISC with no installation on your hard drive. Fast-loading and easy-to-use, Reviewer Embedded ensures that anyone can view your DISC, without requiring them to download or install additional software. Reviewer Embedded will not only decrypt & display encrypted data on the fly (no file-copying), it also allows DICOM objects to be copied from DISC directly to local drive. Customize display configurations for each modality to conform with ACR certification and customer requirements.
